

Roads to Learning and Earning

Lesson Plan

Lesson Topic: Making Appointments

Lesson Developed By: Rhonda Davis

School: Robbinsville High School

Objective Being Taught	Guide families to adult resources needed for establishing long term medical needs, financial planning, guardianship, voting, and photo IDs.
Student Audience/Length	OCS/High School Students/1-2 hours
Materials/Resources Needed	Telephone book
Teaching Procedure	Prior to lesson, contact dentist office, health department, Dr.'s office, hairdresser, etc., to compile list of information or forms necessary to independently make appointments. Ask if they would be willing to talk to students as a group for a possible field trip or participate in helping students practice making phone calls. Students will be instructed to identify a common ailment/toothache/hairstyle or other necessity requiring appointment. Students will then look for number in the phone book of local service providers and the practice either with the professional or practicing in the classroom.
Check for Understanding and Assessment of Lesson	Students will also become familiar with forms required to see dentists and doctors. What information do they know? How do they find that information?
Wrap Up/Review	Students will reflect on how comfortable they are making these calls for themselves. They will identify what they did right and how they might be better prepared should they need to call again.
